

Crassula helmsii

Dense mats of submerged, interwoven stems

Emergent form with erect, somewhat succulent leaves

Fleshy, paired and alternate leaves on a thin rigid stem

Small, four-petalled white flowers are borne on short stalks

Characteristic collar around the stem formed by the paired leaves

Leaves somewhat similar to Callitriche spp. but lack notched tip

Photos: Joe Caffrey (IFI)

Be biosecurity aware! To avoid the risk of introducing and / or spreading harmful aquatic invasive species or pathogens, please clean and disinfect any equipment that has been used or come into contact with water. For best practice guidelines refer to:
