# Lagarosiphon major

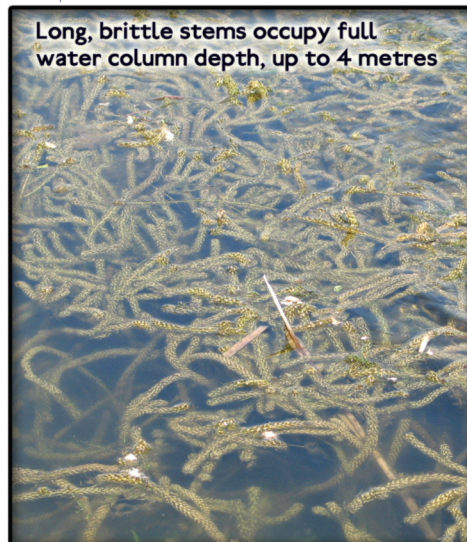

Iascach Intíre Éireann  
Inland Fisheries Ireland

Dense canopy vegetation on water surface in Lough Corrib

Long, brittle stems occupy full water column depth, up to 4 metres

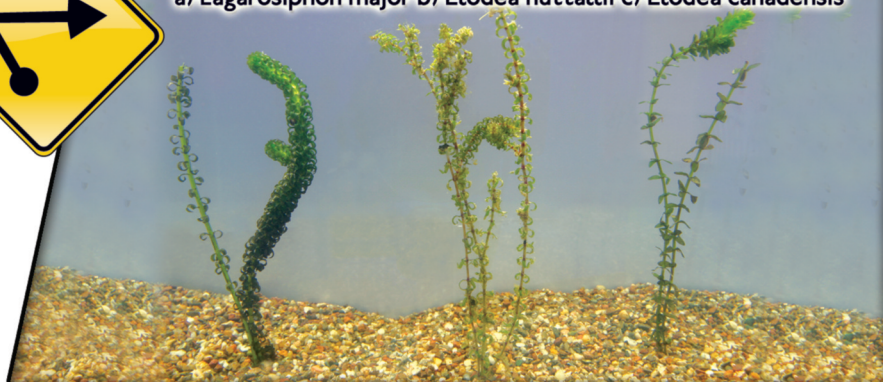

Leaves are strongly recurved and borne in a broadly spiral arrangement

Adventitious roots present on plant fragments to aid recolonisation

a) Lagarosiphon major b) Elodea nuttallii c) Elodea canadensis

Characteristic fragment arrangement

Photos: Joe Caffrey (IFI)

Be biosecurity aware! To avoid the risk of introducing and / or spreading harmful aquatic invasive species or pathogens, please clean and disinfect any equipment that has been used or come into contact with water. For best practice guidelines refer to:
